Description			
As suggested in the forum a snapshot functionality would be useful:			
<ul style="list-style-type: none">• create snapshots by copying the current map and statics into a (timestamped) subdirectory of the cedserver• restore snapshots by copying them back and refresh all subscriptions<ul style="list-style-type: none">◦ maybe even evaluate which blocks did change and only refresh the subscriptions that acutally <i>did</i> change◦ alternatively simply disconnect all clients in the process			

History

#1 - 03/23/2009 05:30 PM - Andreas Schneider

- Target version set to 0.5

#2 - 12/11/2009 06:06 PM - Andreas Schneider

- Target version changed from 0.5 to 0.6

#3 - 12/19/2009 01:48 AM - Andreas Schneider

- Target version deleted (0.6)
